Index to Volume XI., Series II.

A.

Absorption, On the Unpolarized Fluorescence and, of Four Double Chlorides of Uranyl, *Edward L. Nichols* and *H. L. Howes*, 285.

Absorption Bands, on Certain, in the Spectra of the Uranyl Salts, *H. L. Howes*, 66.

Absorption Bands, On Certain, in the Spectra of the Uranyl Salts, *H. L. Howes*, 143.

Achromatization, Complete, of a Two-Piece Lens, *G. W. Moffitt*, 144.

Air, Mobility of Ions in, Hydrogen, and Nitrogen, *Kia-Lok Yen*, 248.

Air-Damped Vibrating System, The, Theoretical Calibration of the Condenser Transmitter, *I. B. Crandall*, 449.

Alter, Dinsmore, Variation of Velocity of Waves due to Motion of the Source, 481.

Alternating Current, Rectification of, by the Corona, *J. W. Davis*, 243.

Amalgamation Variables, The Influence of, upon the Mercury Content and the Crushing Strength of a Dental Amalgam, *Arthur W. Gray* and *Paris T. Carlisle, Fourth*, 492.

American Physical Society:
Abstracts, 132, 241, 326, 479.
Minutes, 130, 477.

Artificial Daylight, A Precision Method for Producing, *Irwin G. Priest*, 502.

Assmann Aspiration Psychrometer, Comparative Accuracy of Whirled Psychrometer, Porous Cup Atmometers, Hair Hygrographs, Piche Evaporimeter Saturation Deficit Recorder, Open Water Surface Evaporimeter, and Dry and Wet Bulb Thermometers, *Alexander McAdie*, 152.

Atomic Number, Electronic Frequency, and, *Paul D. Foote*, 487.

Audion Characteristic Curves, The Effect Produced upon, by Various Kinds of Signals (Buzzer, Electron Relay and 60-Cycle A. C.), *A. D. Cole*, 331.

Audions, Characteristic Curves of Various Types of, *A. D. Cole*, 330.

Aurora Model, Photograph of an, *C. C. Trowbridge*, 482.

Auroral Streamers, On the Observation of the Apparent Focus of, *C. C. Trowbridge*, 483.

B.

Benade, J. M., Elasticity of Impact of Electrons with Gas Molecules, 184.

Benade, J. M., The Theory of Ionization by Collision. IV. Cases of Elastic and Partially Elastic Impact, 234.

Bichowsky, F. Russell v., The Necessary Physical Assumptions Underlying a Proof of the Planck Radiation Law, 58.

Birge, Raymond T., The Mathematical Structure of Band Series, II., 136.

Blanchard, Julian, The Brightness Sensibility of the Retina, 81.

Bohr's Atom, Zeeman's Effect and the Magnetic Properties of the Elements, *Jakob Kunz*, 153.

Boron Conductors, The Breakdown Effort in, *F. W. Lyle*, 253.

Breakdown Effort, The, in Boron Conductors, F. W. Lyle, 253.

Bridgman, P. W., On Equilibrium under Non-Hydrostatic Stress, 180.

Brown, Thomas B., Kathodo-Fluorescence of Crystals, 39.

Buzzer, The Effect Produced upon Audion Characteristic Curves by Various Kinds of Signals (Electron Relay and 60-Cycle A. C.), *A. D. Cole*, 331.

C.

Calcite, Note on a Phosporescent, *H. L. Howes*, 327.

Calcite, Note on the Grating Space of, and the X-Ray Spectrum of Gallium, *Arthur H. Compton*, 430.

Calcite, The Photo-Luminescence and Katho-Luminescence of, *E. L. Nichols, H. L. Howes* and *D. T. Wilber*, 485.

Calorimetric Work, Thermo-couples for Student Use in, *Ralph S. Minor*, 479.

Carbon, Effect of Hydrogen on the Electrical Resistivity of, *T. Peczalski*, 363.

Carbon Compounds, Transparency of Certain, to Waves of Great Length, *H. P. Hollnagel*, 505.

Carlisle, 4th, Paris T., The Influence of Temperature Upon the Crushing Strength of a Dental Amalgam, 154.

Carlisle, Fourth, Paris T., The Influence of Amalgamation Variables upon the Mercury Content and the Crushing Strength of a Dental Amalgam, 492.

Cathode Ray Excitation, A Preliminary

Study of the Luminescence of the Uranyl Salts under, *Frances G. Wick* and *Louise S. McDowell*, 421.
Coblentz, W. W., The Spectral Photoelectric Sensibility of Molybdenite, 497.
Coefficient of Expansion, Young's Modulus of Drawn Tungsten and its Variation with Change of Temperature, including a Determination of the, *H. L. Dodge*, 311.
Cole, A. D., Characteristic Curves of Various Types of Audions, 330.
Cole, A. D., The Effect Produced upon Audion Characteristic Curves by Various Kinds of Signals (Buzzer, Electron Relay and 60-Cycle A. C.), 331.
Collision, The Theory of Ionization by, IV. Cases of Elastic and Partially Elastic Impact, *K. T. Compton* and *J. M. Benade*, 234.
Collision, A Correction in the Theory of Ionization by, *Jakob Kunz*, 246.
Compton, Arthur H., The Nature of the Ultimate Magnetic Particle, 132.
Compton, Arthur H., The Size and Shape of the Electron, 330.
Compton, Arthur H. Compton, Note on the Grating Space of Calcite and the X-Ray Spectrum of Gallium, 430.
Compton, K. T., Elasticity of Impact of Electrons with Gas Molecules, 184.
Compton, K. T., The Theory of Ionization by Collision. IV. Cases of Elastic and Partially Elastic Impact, 234.
Condenser Transmitter, The Air-Damped Vibrating System, Theoretical Calibration of the, I. B. Crandall, 449.
Crandall, I. B., The Air-Damped Vibrating System, Theoretical Calibration of the Condenser Transmitter, 449.
Crystals, Kathodo-Fluorescence of, *Thomas B. Brown*, 39.

D.

D Lines, The Ratio of the Intensities of the, of Sodium, *Vivian Voss*, 21.
Davey, Wheeler P., Emulsions: (*a*) A New Method for Making Emulsions. (*b*) Properties of Emulsions, 138.
Davey, Wheeler P., Increase in Length of Life of Tribolium Confusum, 493.
Davis, Bergen, Characteristic X-Ray Emission as a Function of the Applied Voltage, 433.
Davis, J. W., Rectification of Alternating Current by the Corona, 243.
Dempster, A. J., A New Method of Positive Ray Analysis, 316.
Dental Amalgam, The Influence of Temperature upon the Crushing Strength of a, *Arthur W. Gray* and *Paris T. Carlisle, Fourth*, 154.
Dental Amalgam, The Influence of Amalgamation Variables upon the Mercury Content and the Crushing Strength of a, *Arthur W. Gray* and *Paris T. Carlisle*, 492.
Derieux, John B., Photoelectric Effects on Mercury Droplets, 276.
Dershem, Elmer, A Mono-Wave-Length X-Ray Concentrator, 244.
Dershem, Elmer, Wave-Lengths of the Tungsten X-Ray Spectrum, 244.
Dershem, Elmer, Wave-Lengths of the Tungsten X-Ray Spectrum, 461.
Derieux, John B., The Use of Mercury Droplets in Millikan's Experiment, 203.
Dodd, L. E., Further Verification of Knudsen's Equations for Resistance to Molecular Flow, 242.
Dodge, H. L., Young's Modulus of Drawn Tungsten and its Variation with Change of Temperature, including a Determination of the Coefficient of Expansion, 311.
Doubt, Thomas E., The Determination of Organic Compounds by an Optical Method, 249.
Duane, William, On the Critical Absorption and Characteristic Emission X-Ray Frequencies, 489.
Duane, William, On the Relation between the K X-Ray Series and the Atomic Numbers of the Chemical Elements, 488.
Duane, William, The Relation between the General X-Radiation and the Atomic Number of the Target, 491.

E.

Elasticity of Impact of Electrons with Gas Molecules, *J. M. Benade* and *K. T. Compton*, 184.
Electrical Resistivity, Effect of Hydrogen on the, of Carbon, *T. Peczalski*, 363, 508.
Electromagnetic Driving, The Influence of Amplitude of, on the Frequency of Tuning Forks, *Dayton C. Miller*, 497.
Electron, The Size and Shape of the, *Arthur H. Compton*, 330.
Electrons, Elasticity of Impact of, with Gas Molecules, *J. M. Benade* and *K. T. Compton*, 184.
Electrons, The Resonance and Ionization Potentials for, in Thallium Vapor. *Paul D. Foote* and *Fred L. Mohler*, 486.
Electron Relay, The Effect Produced upon Audion Characteristic Curves by Various Kinds of Signals (Buzzer, 60-Cycle A. C.), *A. D. Cole*, 331.
Electronic Frequency and Atomic Number, *Paul D. Foote*, 487.
Emission Velocity, Some Preliminary Results in a Determination of the Maximum, of the Photoelectrons from Metals at X-Ray Frequencies, *Kang-Fuh Hu*, 505.
Emulsions: (*a*) A New Method for Making Emulsions. (*b*) Properties of Emulsions, *Wheeler P. Davey*, 138.

Energy Partition, A General Theory of, with Applications to Quantum Theory, *Richard C. Tolman*, 261.
Equilibrium, On, under Non-Hydrostatic Stress, *P. W. Bridgman*, 180.
Erratum, 508.
Evaporimeter, A Self-Recording, *Alexander McAdie*, 147.

F.

Fenner, Clarence N., Methods of Temperature-Control in Glass-Melting Furnaces, 141.
Fluorescence, On the Thermodynamics of, *E. H. Kennard*, 29.
Fluorescence, A Study of the, of Certain Uranyl Salts at Room Temperature, *Frances G. Wick*, 100.
Fluorescence, On the Unpolarized, and Absorption of Four Double Chlorides of Uranyl, *Edward L. Nichols* and *H. L. Howes*, 285.
Foote, Paul D., The Resonance and Ionization Potentials for Electrons in Thallium Vapor, 486.
Foote, Paul D., Electronic Frequency and Atomic Number, 487.
Forsythe, W. E., Note on a Comparison of High-Temperature Scales, 139.
Freud, B. B., The Determination of Organic Compounds by an Optical Method, 249.

G.

Gallium, Note on the Grating Space of Calcite and the X-Ray Spectrum of, *Arthur H. Compton*, 430.
Gas Molecules. Elasticity of Impact of Electrons with, *J. M. Benade* and *K. T. Compton*, 184.
Gaseous Ions, The Mobilities of, *Kia-Lok Yen*, 337.
Germann, Frank E. E., A New Hydrate of Uranium Nitrate; Uranium Nitrate 1-cositetrahydrate, 245.
Gray, Arthur W., The Influence of Temperature Upon the Crushing Strength of a Dental Amalgam, 154.
Gray, Arthur W., The Influence of Amalgamation Variables upon the Mercury Content and the Crushing Strength of a Dental Amalgam, 492.

H.

Hair Hygrographs, Comparative Accuracy of Whirled Psychrometer, Assmann Aspiration Psychrometer, Porous Cup Atmometers, Piche Evaporimeter Saturation Deficit Recorder, Open Water Surface Evaporimeter, and Dry and Wet Bulb Thermometers, *Alexander McAdie*, 152.
Hall, Edwin H., Theory of Thermal Conductivity in Metals, 329.
Harmonic Synthesizer, An, having Components of Incommensurable Period and any Desired Decrement, *William J. Raymond*, 479.

X-Ray Concentrator, A Mono-Wave-Length, *Elmer Dershem*, 244.
X-Ray Emission, Characteristic, as a Function of the Applied Voltage, *Bergen Davis*, 433.
X-Ray Frequencies, On the Critical Absorption and Characteristic Emission, *William Duane* and *Kang-Fuh Hu*, 489.
X-Ray Frequencies, Some Preliminary Results in a Determination of the Maximum Emission Velocity of the Photoelectrons from Metals at, *Kang-Fuh Hu*, 505.
X-Radiation, The Relation between the General, and the Atomic Number of the Target, *William Duane* and *Takeo Shimizu*, 491.
X-Ray Spectra, An Experimental Investigation of the Energy in the Continuous, of Certain Elements, *Clayton T. Ulrey*, 401.
X-Ray Spectrum, Wave-Lengths of the Tungsten, *Elmer Dershem*, 244.
X-Ray Spectrum, Note on the Grating Space of Calcite and the, of Gallium, *Arthur H. Compton*, 430.
X-Ray Spectrum, Wave-Lengths of the Tungsten, *Elmer Dershem*, 461.

Y.

Yen, Kia-Lok, Mobility of Ions in Air, Hydrogen, and Nitrogen, 248.
Yen, Kia-Lok, The Mobilities of Gaseous Ions, 337.
Young's Modulus of Drawn Tungsten and its Variation with Change of Temperature, including a Determination of the Coefficient of Expansion, *H. L. Dodge*, 311.

Z.

Zeeman's Effect, Bohr's Atom, and the Magnetic Properties of the Elements, *Jakob Kunz*, 153.
